

Teach Your Children Spanish through Reading Together

Literacy is an important aspect of your child's development! By adding bilingual titles to your home library is an excellent way to **enrich your child's development with Spanish**. Teaching your children Spanish through reading is a **fun, easy way** to keep the language learning alive. Here are a few tips and resources for **teaching Spanish** through reading together:

1. If your own Spanish is limited, choose titles that have small amounts of text, so that you are able to read and reinforce the story without trying to read too much. Board books by Rebecca Emberly are a great choice.
2. Whether you are a native speaker or learning alongside your child, audio books offer a great option for reading together. Check out [Lorito Books](#) and their great list of bilingual audio books. You and your children will love listening to the stories aloud!
3. Barron Books have a great collection of bilingual titles, including cute pictures, and easy to follow along story lines. Kids are able to easily make connections with the text and illustrations.
4. If you haven't bookmarked [Latin Baby Book Club](#), now is your chance! They have a wonderful list of Spanish and bilingual titles that they review and recommend. I have found so many fabulous books to add to my collection from this helpful site.
5. If you like to do computer activities with your children, visit [Cody's Cuentos](#) and enjoy the online audio stories together. You and your children will be able to follow along with text and practice comprehension and fluency.

Buena Suerte!
